**Title: The Connected Enterprise**  
*The Voyage to the Factory of the Future*

**Speaker: Tim McCain Rockwell Automation**

**Abstract:**

We have all heard about how the “Factory of the Future” will be able to access almost any device installed on the plant floor. We hear about the “Internet of Things” and we are moving to put the infrastructure in place to accomplish these connections. But what are we going to do with all this data when it becomes available to us? We will cover some concrete examples of how this data can be used if you have the connections available at the device level.

**Bio**

**Tim McCain**

Tim McCain is the Information Software Regional Manager supporting the Northeastern United States. In this role, he is responsible for the FactoryTalk Software Portfolio and works with Rockwell Automation’s ecosystem of field sales, professional services, distribution, and system integrator partners to bring information solutions to customers. In his 16 year career with Rockwell Automation, Tim has held a variety of roles with increasing responsibilities including Applications Engineer, Consultant, and Solutions Architect.
